Social Sciences Research Gail M. Staines 2019-03-04 This is a complete revision with new material of the second edition of *Social Sciences Research: Research, Writing, and Presentation Strategies for Students* (Scarecrow Press, 2008). There have been significant changes in the research process in the social sciences since the second edition of this text was published in 2008 - a decade ago. The plethora of new information technologies (e.g., smart phones, tablets, apps, etc.); the information overload not only on the Internet where anyone can publish, but also with the explosion of social media (e.g., Twitter, Facebook, Instagram, etc.); as well as the far reaching changes in databases and other sources of electronic information that is available. Complementing the manual are appendixes consisting of a list of possible research questions, an example paper, a complete set of worksheets, and blank citation forms to be used to record references, which provide further practice for students. In this third edition, the author has included more instruction on searches using electronic sources as well as new formatting guidelines that have been promulgated in the past several years. The ideal resource for college students, this manual addresses the finer points of research and writing that are not given enough instruction in the classroom.

The Essential Guide James D. Lester (Sr.) 2008 Low cost, small trim size, and concise coverage make this research guide a valuable but non-intrusive supplement to a core text or anthology in any college course that requires a research paper. Coverage of Internet sources includes attention to critical evaluation of these sources and tips for using discipline-specialized search engines. Chapter on preparing electronic projects explains methods for incorporating slide presentations, web sites, web pages, and digital graphics into the research paper. Increased coverage of the library's electronic resources, including academic databases. A new chapter 5 focuses on avoiding plagiarism and practicing academic integrity. New chapters 6 and 7 help students identify the best sources, evaluate them for relevancy, authority, and accuracy and to create notes that paraphrase, quote, and summarize effectively. Complete and up-to-date coverage of four documentation systems -- MLA, APA, CBE, and Chicago style -- also includes coverage of

electronic sources according to the latest editions of these respective style manuals.
