

Competencias Para Profe

Competencias docentes del profesorado universitario Miguel Ángel Zabalza 2003-02-27 Quality and professional development - The thesis of this book is that the University develops a formative task at the higher levels as required, in order to be effective, with regard to institutional conditions as well as the capacitation of their personnel. The formative mission of each university institution is concretized and carried out in its curricular offer and its quality of formation, for its part, it will depend in good measure on the performance of the teachers. Today it is beyond doubt that good teaching requires command of different competencies on the part of the teachers of each faculty or school. The "university curriculum", the "teaching skills" and the "analysis of the teaching quality" are the three big parts in the book. Ten competencies that summarize the most important aspects of the university professors' activity are analysed. Competencies that can serve as a mark of reference for a possible program of qualification of the university professors.

Didáctica y prácticas docentes con base en competencias Diana Mirley Gutiérrez Osorio 2022-01-25

Este libro muestra las experiencias y resultados propios del ejercicio en las aulas con base en los postulados del Modelo Educativo Crítico con Enfoque de Competencias (MECCEC). Las investigaciones que conforman este volumen abordan problemas fundamentales para los procesos de enseñanza y aprendizaje desde la didáctica. En primera instancia, el capítulo "Conocimientos, actitudes y prácticas docentes para el modelo de competencias en una universidad multicampus colombiana" busca responder la pregunta: ¿cómo enseñan nuestros maestros? La investigación se centra en entender la forma en que los docentes de la UCC han asumido el modelo por competencias. De allí se extraen evidencias que permiten identificar estrategias didácticas que potencian las prácticas en el aula, así como potencialidades que pueden desarrollarse y oportunidades de mejora. En el segundo capítulo, "De la didáctica crítica a las estrategias de enseñanza para el desarrollo de competencias en lectura crítica y comunicación escrita", se hace un análisis sobre cuáles son las contribuciones de la didáctica crítica a las estrategias de enseñanza para el desarrollo de dichas competencias en el programa Contaduría Pública. El capítulo final, "Estrategias didácticas para desarrollar un proceso de educación contable con enfoque de competencias en la Universidad Cooperativa de Colombia", responde, a través de un ejercicio de análisis in situ, a cómo la implementación del modelo educativo ha transformado el currículo desde la perspectiva de la didáctica general y plantea estrategias que faciliten el seguimiento y evaluación al modelo, con acciones que permitan mejorar la relación entre profesores y estudiantes en el aula.

Cómo mejorar las competencias de los docentes Elena Cano García 2005-09-26 Este libro aborda siete competencias especialmente importantes en el ámbito de la profesión docente: las capacidades de planificar y organizar el propio trabajo, de comunicarse, de trabajar en equipo, de afrontar conflictos desarrollando habilidades interpersonales, de utilizar las nuevas tecnologías, de revisar constantemente nuestro trabajo y de hacer todo ello con responsabilidad y realismo, conociendo nuestras posibilidades y nuestras debilidades. Para el profesorado (desde la educación infantil hasta la enseñanza universitaria en el ámbito formal) y para los formadores en general, disponer de ciertas competencias personales e interpersonales que nos ayuden a enfrentar los retos crecientes y cambiantes de la época que nos ha tocado vivir es especialmente importante porque, de algún modo, el desarrollo de otros individuos depende, en parte, de nuestro trabajo.

DEVELOPMENT. How does one learn how to teach? - Through experiences analyzed in this book, in the countries of the OECD as much as in Latin America, and in spite of the great heterogeneity of contexts, a series of factors can be identified that act positively in the development of professional education. The educational policies of each country should identify objectives and orientations adapted to their own circumstances. Good policies are needed in order that development of professional education ensures the competencies that teachers and professors will require along their extensive professional trajectory. Society needs good teachers and professors whose professional practice responds to professional standards of quality, and that they comply in the first place with a basic commitment: that of respecting the right of students to learn.

Instilling Diversity and Social Inclusion Practices in Teacher Education and Curriculum

Development Alegre de la Rosa, Olga María 2022-06-30 There has recently been a societal push to better achieve equity for all, with many bringing to light the bias, racism, and discrimination that many factions face on a daily basis. Naturally, integrating diversity and social inclusion thoughts into the classroom is one of the best ways to start changing the mindset of society and promoting more inclusive practices in the next generations. Therefore, diversity and social inclusion have become common approaches in the planning and management of primary, secondary, and higher education schools in many international contexts. However, there are certainly challenges that must be overcome in developing these new practices and their implementation within teacher curriculum. Instilling Diversity and Social Inclusion Practices in Teacher Education and Curriculum Development provides an analysis of educational inclusion practices and identifies university students' voices on diversity and social inclusion. It further assesses teacher performance in an international online training context and promotes a model of curriculum development on diversity and social inclusion. Covering topics such as culturally competent teachers, student academic achievement, and attitudes towards diversity, this premier reference source is an excellent resource for teacher educators, pre-service teachers, administrators and educators of both K-12 and higher education, social workers, researchers, and academicians.

Informe de seguimiento de la educación en el mundo Global Education Monitoring Report Team 2024-02-29 La tecnología de la información y la comunicación tiene potencial para apoyar la equidad y la inclusión en cuanto a llegar al alumnado desfavorecido y difundir más conocimientos en formatos atractivos y asequibles. En determinados contextos y para algunos tipos de aprendizaje, puede mejorar la calidad de la enseñanza y el aprendizaje de competencias básicas. En cualquier caso, las competencias digitales han pasado a formar parte de un paquete de competencias básicas. La tecnología digital también puede apoyar la gestión y aumentar la eficiencia, ayudando a manejar mayores volúmenes de datos educativos. Pero la tecnología también puede excluir y ser irrelevante y gravosa, cuando no directamente perjudicial. Los gobiernos deben garantizar las condiciones adecuadas para permitir un acceso equitativo a la educación para todos, regular el uso de la tecnología para proteger al alumnado de sus influencias negativas y preparar al profesorado.
