At A Loss For Words Diane Schoemperlen 2010-08-10 In a "he said, she said" story, the writer always gets the last word. She is a writer, established and successful, with a full life and supportive friends. Then he walks into a book signing and back into her life 30 years after he broke her heart. This time, things seem different. The pair reconnects through emails, messages and fragments of conversation. But love leaves her with a nasty case of writer's block. Looking for inspiration in the texts around her -- optimistic horoscopes, evasive fortune cookies and the inane suggestions from books on writer's block -- she tries to find a way through the relationship that has seemingly stolen her gift for language. Spinning us through the whirlwind love of her nameless protagonist, award-winning author Diane Schoemperlen weaves a stylish, innovative novel out of to-do lists and text messages. Exploring the different emotional languages spoken by men and women, *At A Loss For Words* is a charming take on the modern romance, warm and witty right through to its surprising and delicious resolution.

Formal Aspects of Context Pierre Bonzon 2013-04-17 We welcome Volume 20, *Formal Aspects of Context*. Context has always been recognised as strongly relevant to models in language, philosophy, logic and artificial intelligence. In recent years theoretical advances in these areas and especially in logic have accelerated the study of context in the international community. An annual conference is held and many researchers have come to realise that many of the old puzzles should be reconsidered with proper attention to context. The volume editors and contributors are from among the most active front-line researchers in the area and the contents shows how wide and vigorous this area is. There are strong scientific connections with earlier volumes in the series. I am confident that the appearance of this book in our series will help secure the study of context as an important area of applied logic. D.M.Gabbay

INTRODUCTION This book is a result of the First International and Interdisciplinary Conference on Modelling and Using Context, which was organised in Rio de Janeiro in January 1997, and contains a selection of the papers presented there, refereed and revised through a process of anonymous peer review. The treatment of contexts as bona-fide objects of logical formalisation has gained wide acceptance in recent years, following the seminal impetus by McCarthy in his Turing award address.
