The Brainy Bunch Kip Harding 2014-05-06 Two parents share the extraordinary and inspirational story of how they sent six of their ten children to college by the age of twelve—and how any parent can achieve the same amazing success. If the Harding family can do it, your family can too! Having six out of ten kids go to college is no small feat on its own, but having six kids in college by the age of twelve— that's nothing short of incredible. Meet Kip and Mona Lisa Harding, high school sweethearts whose simple homeschooling method produced exactly those extraordinary results. Kip and Mona Lisa are parents to an engineer (who earned her BS in mathematics at 17), an architect (who finished her five-year program at 18 and became the youngest member of the American Institute of Architects), a Navy physician (who earned her biology degree at 17), an entrepreneur (who earned a BA in English at 15 and an MS in computer science at 17), a 15-year-old college senior studying music theory and performance, a 12-year-old Middle Ages scholar with the highest average in his college class, and four others who are following fast in their siblings' footsteps! No wonder the family is so used to being asked: How did you do it? The Hardings are the first to say they're not geniuses. Nor do they run a strict, high-pressure household. Instead, they find out early what really motivates their children, instill their kids with dreams, and allow those dreams to blossom. In a remarkable, down-to-earth narrative that is part captivating memoir, part

invaluable guidebook for parents, Kip and Mona Lisa reveal with warmth and humility the strategies behind their family's amazing educational accomplishments. Filled with daily regimens, advice for providing children with fulfilling experiences that go beyond the home, and tips for making the transition to college, theirs is an inspirational real-life success story that anyone can achieve—whether you homeschool your children or not. The Brainy Bunch is uplifting and ultimately relatable proof of what any family can accomplish through dedication, love, faith, and hard work.

The Core Leigh A. Bortins 2010-06-08 In the past, correct spelling, the multiplication tables, the names of the state capitals and the American presidents were basics that all children were taught in school. Today, many children graduate without this essential knowledge. Most curricula today follow a haphazard sampling of topics with a focus on political correctness instead of teaching students how to study. Leigh Bortins, a leading figure in the homeschooling community, is having none of it. She believes that there are core areas of knowledge that are essential to master. Without knowing the multiplication tables, children can't advance to algebra. Without mastery of grammar, students will have difficulty expressing themselves. Without these essential building blocks of knowledge, students may remember information but they will never possess a broad and deep understanding of how the world works. In *The Core*, Bortins gives parents the tools and methodology to implement a

rigorous, thorough, and broad curriculum based on the classical model, including: - Rote memorization to cement knowledge - Systematic learning of geography, historical facts, and timelines - Reading the great books and seminal historical documents instead of adaptations and abridged editions - Rigorous training in math and the natural sciences
