*Plant Adaptations to Phosphate  
Deficiency* Alex Joseph  
Valentine 2021-05-18

Phosphate is an essential  
mineral to all plants, and its  
availability in soils is an  
increasing challenge for  
agriculture. Phosphate is  
abundant in soils but its  
biological availability is often  
low due to the complexes that  
it forms with soil minerals and  
compounds. The biological  
availability of Phosphate is  
further reduced in acidic soils,  
which represent approximately  
40% of earth's arable

agricultural lands. Agricultural systems compensate Phosphate deficiency with fertilizers coming from the mining of rock phosphate, which is estimated to exhaust within the next 50 years. For these reasons, Phosphate limitations in natural and agricultural ecosystems is going to become a global problem, and we urgently need to better understand how plants respond to Phosphate deficiency.

**Eurasia 2.0** Mark Bassin 2016-03-17 This book discusses the return of geopolitical ideas and doctrines to the post-Soviet space with special focus on the new phenomenon of digital geopolitics, which is an overarching term for different political practices including dissemination of geopolitical

ideas online, using the internet by political figures and diplomats for legitimization and outreach activity, and viral spread of geopolitical memes. Different chapters explore the new possibilities and threats associated with this digitalization of geopolitical knowledge and practice. Our authors consider new spatial sensibilities and new identities of global as well as local Selves, the emergence of which is facilitated by the internet. They explore recent reconfigurations of the traditional imperial conundrum of center versus periphery. Developing Manuel Castells' argument that social activism in the digital era is organized around cultural values, the essays discuss new geopolitical ideologies which aim to reinforce Russia's spiritual sovereignty as a unique civilization, while at the same time seeking to rebrand Russia as a greater soft power by utilizing the Russian-speaking diaspora or employing traditionalist rhetoric. Great Power imagery, enemy-making,

and visual mappings of Russia's future territorial expansion are traditional means for the manipulation of imperial pleasures and geopolitical fears. In the age of new media, however, this is being done with greater subtlety by mobilizing the grassroots, contracting private information channels, and de-politicizing geopolitics. Given the political events of recent years, it is logical that the Ukrainian crisis should provide the thematic backdrop for most of the authors.
