Implementing Triple Bottom Line Sustainability into Global Supply Chains Lydia Bals 2017-09-08

The global sustainability challenge is urgent, tremendous and increasing. From an ecological perspective, the current worldwide resource footprint requires approximately 1.5 planets to sustain existing life, and with current usage would require two planets by 2030. The social impact of ever-growing resource use disproportionately affects the world's poor - the 3 billion people living on less than \$2.50 a day, as they struggle to acquire what is needed to survive. The serious ecological and social challenges we face in trying to establish global sustainable supply chains must not be

underestimated, yet so far research has largely ignored the social dimension in favour of the environmental and economic. So how can we develop business strategies that move away from a primary economic focus and give equal weight to people, planet and profit? How can we create sustainable supply chains that take a true triple-bottom-line approach? Implementing Triple Bottom Line Sustainability into Global Supply Chains features innovative research, highlighting new cases, approaches and concepts in how to successfully implement sustainability - covering economic, ecological and social dimensions - into global supply chains. The four parts cover the rationale for sustainable global supply chains, key enablers, case studies showing clear implementation steps, and directions for future research and development. This book is a must-read for any academic researching in sustainable supply chain management, procurement or business strategy, and for business leaders seeking cases

that will inform a critical step forward for CSR programmes.

Public Finance and Financial

Administration Bharati Garg 2025-04-24 This book offers a comprehensive exploration of different aspects of public finance and its administrative practices across different countries. Based on a comprehensive review of existing literature, it combines theoretical exploration and practical case studies of developed and developing countries. Part I of this volume provides a basic understanding of the concept of public finance. Part II examines the role of budget with a detailed discussion of budgetary cycles in the U.S.A., Brazil, and India. It also provides an in-depth coverage of performance budgeting practices, focusing on the OECD countries. Part III focuses on intergovernmental federal fiscal relations with a special focus on India, along with the Ministries

Key Competences and New Literacies Maria Dobryakova 2023-08-22 This edited book is a unique comprehensive discussion of 21st century skills in education in a comparative perspective. It presents investigation on how eight very different countries (China, Canada, England, Finland, Poland, South Korea, the USA and Russia) have attempted to integrate key competences and new literacies into their curricula and balance them with the acquisition of disciplinary knowledge. Bringing together psychological, sociological, pedagogical approaches, the book also explores theoretical underpinnings of 21st century skills and offers a scalable solution to align multiple competency and literacy frameworks. The book provides a conceptual framework for curriculum reform and transformation of school practice designed to ensure that every school graduate thrives in our technologically and culturally changing world. By providing eight empirical portraits of

competence-driven curriculum reform, this book is great resource to educational researchers and policy makers.
