**Building and Managing E-Book Collections** Richard Kaplan 2012-08-05 Are you looking for a best practices guide to developing policies and procedures for acquisition, purchase, collection development, cataloging, and retention of e-books? Beginning with a short history of e-books and a review of the e-book publishing industry and its effect on library's selection and budget process, this how-to provides a thorough treatment of collection development issues, including the selection process and development policies, the use of approval plans, patron-driven acquisition, and practical solutions for creating your e-book collection policies. Chapters on budgeting and licensing covers ownership versus leasing models, the differences in licensing options from the major publishers and aggregators including information on digital rights management, and strategies for success in retention, access, and budgeting. The cataloging and selection chapters are the largest in the book. The "selecting e-books" chapter discusses: \* e-book purchasing models \* file formats and publisher/aggregator e-book platforms8 \* an examination of display devices (e-readers) The technical and access services section gives you: \* Best practices in cataloging e-books to include metadata. \* Insight on incorporating value added features such as adding excerpts from the text, book covers, and links to related resources. \* Guidance on library web page and online catalog access. \* Assessment and evaluation strategies through circulation statistics, print collection selection and usage, and user satisfaction. You'll also gain valuable insight on the e-book's impact on the publishing industry, scholarly communication, and its integration into future technologies and social media. Offering multiple perspectives from electronic resource professionals at world-renowned libraries such as Harvard, the University of Michigan, Duke, and Northeastern, this book provides a comprehensive and well-rounded e-book education. Goodman and Gilman's The Pharmacological Basis of Therapeutics, Twelfth Edition Laurence Brunton 2011-01-14 The landmark text in medical pharmacology is now in full color Includes DVD with image bank A Doody's Core Title ESSENTIAL PURCHASE for 2011! 4 STAR DOODY'S REVIEW! "This 12th edition of the most authoritative book in pharmacology is the best both in content and physical appearance....This edition of Goodman & Gilman's continues to be the most authoritative and widely used resource bridging the discipline of pharmacology with therapeutics. Moreover, readers will find this edition to be substantially improved from past editions in both content and physical appearance."--Doody's Review Service The most universally respected and read medical text in all of pharmacology, Goodman & Gilman's The Pharmacological Basis of Therapeutics represents the pinnacle of authority and accuracy in describing the actions and uses of therapeutic agents in relation to physiology and pathophysiology. Goodman & Gilman's careful balance of basic science and clinical application has guided thousands of practitioners and students to a clear understanding of the drugs essential to preventing, diagnosing, and treating disease. Enriched by a new full-color presentation and updated to reflect all critical new developments in drug action and drug-disease interaction, the twelfth edition includes more than 440 color illustrations depicting key principles and actions of specific pathways and therapeutic agents. The companion DVD includes all the images and tables in the text along with narrated animations. Goodman & Gilman's The Pharmacological Basis of Therapeutics, 12e is divided into nine sections, covering: General Principles Neuropharmacology Modulation of Cardiovascular Function Inflammation, Immunomodulation, and Hematopoiesis Endocrine Pharmacology Gastrointestinal Pharmacology Chemotherapy of Infectious Disease Chemotherapy of Neoplastic Diseases Special Systems Pharmacology More than a textbook, Goodman & Gilman's is a

working template for the effective and rational prescribing of drugs in daily practice.

**Paediatric Oncology** Faith Gibson 1999 The book addresses four modalities of treatment: chemotherapy, surgery, radiotherapy, and bone marrow transplant. Each of the four sections looks at specific areas including symptom management, complications, and late effects.

**Cancer Chemotherapy and Biotherapy** Bruce A. Chabner 2011-12-07 Updated to include the newest drugs and those currently in development, this Fifth Edition is a comprehensive reference on the preclinical and clinical pharmacology of anticancer agents. Organized by drug class, the book provides the latest information on all drugs and biological agents—their mechanisms of action, interactions with other agents, toxicities, side effects, and mechanisms of resistance. The authors explain the rationale for use of drugs in specific schedules and combinations and offer guidelines for dose adjustment in particular situations. This edition's introduction includes timely information on general strategies for drug usage, the science of drug discovery and development, economic and regulatory aspects of cancer drug development, and principles of pharmacokinetics. Eight new chapters have been added and more than twenty have been significantly revised. A companion website includes the fully searchable text and an image bank.

Lung Cancer Robert L. Carafaro 2005 Lung cancer is the most common form of cancer in the world and a major cause of death. This new book brings together stellar research from around the world. The two main types of primary lung cancer, small cell and non-small cell are examined. The book's scope encompasses the three main types of non-small cell lung cancer: squamous cell carcinoma which is the commonest type of lung cancer and develops in the cells which line the airways; adenocarcinoma develops from the cells which produce mucus in the lining of the airways; and large cell carcinoma gets its name from the large, rounded cells that are seen when they are examined under the microscope. About 1 in 5 lung cancers are small cell, the rest non-small cell. Causes of lung cancer are primarily smoking, but include as well exposure to radon, asbestos, uranium, arsenic, and certain petroleum products. Research and new drugs are appearing with increasing frequency in this field.
