Readiness Elliot Regenstein 2026-01-07 An enlightening overview of how

early childhood education and care works in the United States and practical steps for how the systems of delivery might be improved In Readiness, Elliot Regenstein dives into how states oversee publicly funded early childhood services. While early education and care have increasingly been treated as a public good, families still struggle to find the services they need. This book looks at the states seeking to develop coherent systems from a mix of care and education programs, highlighting successes achieved to date and laying out the challenges ahead. It is an insider's guide to who makes which decisions in state early childhood systems—and how those decisions get made. Regenstein looks at the capacity states have to manage their systems, and how they have worked to reorient their capacity over time to better serve families with young children. He looks at how states have supported community-level leadership, including how early childhood providers have sought to work with public schools. The book highlights the information gaps that have plagued state and local leaders, and some of the growing efforts to close those gaps. It also examines the advocates and philanthropists whose work has a major influence on state policy. Regenstein provides examples of how states have unified governance, strengthened community capacity, and upgraded data collection and delivery to respond to the needs of families and communities. He recommends next steps for policymakers in state and local government, advocates, and philanthropists to bring about positive change to achieve aligned, well-funded early childhood care services.

Relevant and readable, this Eighth Edition of Essentials of Health Care Finance is fully revised and updated with current, real-world examples of financial problems and solutions as well as the latest financial ratio standards. Climate in Context Adam S. Parris 2016-03-16 Society is increasingly affected by climate impacts, from prolonged water shortages to

damaging coastal floods and wildfires. Scientists studying climate variations are eager to have their knowledge used in adaptive decision making. To achieve this, science and society must engage productively around complex management and policy challenges. For over 20 years, the science-society interface has been fertile ground for the Regional Integrated Sciences and Assessments (RISA) programs sponsored by the U.S. National Oceanic and Atmospheric Administration. Climate in Context describes what it takes to help scientists and stakeholders work together to "co-produce" climate science knowledge, policy, and action. This state-of-the art synthesis reflects on lessons learned by RISA programs, and provides a sober assessment of the challenges ahead. Through case studies from various US regions, this book provides lessons and guidance for organizations and individuals who want to work at the science-society interface on a range of climate challenges.

International Handbook of Financial Literacy Carmela Aprea 2016-03-24 This Handbook presents in-depth research conducted on a myriad of issues within the field of financial literacy. Split into six sections, it starts by presenting prevalent conceptions of financial literacy before covering financial literacy in the policy context, the state and development of financial literacy within different countries, issues of assessment and evaluation of financial literacy, approaches to teaching financial literacy, and teacher training and teacher education in financial literacy. In doing so, it provides precise definitions of the construct of financial literacy and elaborates on the state and recent developments of financial literacy around the world, to show ways of measuring and fostering financial literacy and to give hints towards necessary and successful teacher trainings. The book also embraces the diversity in the field by revealing contrasting and conflicting views that cannot be bridged, while at the same time making a contribution by re-joining existing materials in one volume which can be used in academic discourse, in research-workshops, in university lectures and in the definition of program initiatives within the wider field of financial literacy. It allows for a landscape of financial literacy to be depicted which would foster the implementation of learning opportunities for human beings for sake of well-being within financial living-conditions. The Handbook is useful to academics and students of the topic, professionals in the sector of investment and banking, and for every person responsible for managing his or her financial affairs in everyday life.
