The Real Citrix CCA Exam Preparation Kit Shawn Tooley
2009-05-18 The Citrix Certified Administrator (CCA) credential is the first tier of Citrix certification. The CCA is most often sought out by IT professionals whose networks employ Citrix virtualization technology, and for those IT professionals who are seeking a broad base of general network expertise. The number of CCAs is estimated at between 65 and 70K, up from 45,000 in 2003. Citrix recently released a new version of its most popular product, XenApp (formerly Presentation Server). This new version is fully compatible with Windows Server 2008. To retain their CCA credential, all current CCAs will need to upgrade to the new software. This will be particularly important to those companies enrolled in Citrix partner programs, as current certification is a requirement of the program. When packaged with practice exams, this prep

kit will offer an affordable, effective solution for CCA certification and re-certification. - Complete exam-prep package includes full coverage of new XenApp 5.0 objectives - Authored by a Citrix expert with hundreds of implementations to his credit - This preparation kit can also be used as a reference guide for administrators who need to integrate XenApp 5.0 with their networks

Covering FileMaker for both Windows and Macintosh, FileMaker Pro: The Missing Manual is ideal for small business users, home users, school teachers, developers--anyone who wants to organize information efficiently and effectively. Whether you want to run a business, publish a shopping cart on the Web, plan a wedding, manage a student information system at your school, or program databases for clients, this book delivers. Author Geoff Coffey has many years of experience using FileMaker Pro (he was, in fact, an early beta tester for the product). Author Susan Prosser is a FileMaker Certified Developer who trains other developers. Together, Coffey and Prosser show you how to: Get FileMaker up and running

quickly and smoothly Import and organize information with ease Design relational databases that are simple to use, yet powerful Take advantage of FileMaker Pro calculation capabilities Automate processes with scripting Customize FileMaker Pro to your needs and preferences Share information with other people (coworkers, clients, and customers) and other programs Understand and select the best security options What could easily come across as dry and intimidating--things like relational theory, calculations, and scripting--are presented in a way that is interesting and intuitive to mainstream users.
