Social Justice and Transformative Learning Saundra M. Tomlinson-Clarke 2016-03-10 The similarities between the United States and South Africa with respect to race, power, oppression and economic inequities are striking, and a better understanding of these parallels can provide educational gains for students and educators in both countries. Through shared experiences and perspectives, this volume presents scholarly work from U.S. and South African scholars that advance educational practice in support of social justice and transformative learning. It provides a comprehensive framework for developing transformational learning experiences that facilitates leadership for social justice, and a deeper understanding of the factors influencing personal, national and global identity.

[Advancing Knowledge and Building Capacity for Early Childhood](#)

[Research](#) Sharon Ryan 2021-01-20 This volume employs a multidisciplinary approach to research on a high-profile topic very much on the agenda of state and national policy leaders: early childhood development and education. It aims to reflect how scholarly perspectives shape the contours of knowledge generation, and to illuminate the gaps that prevent productive interchange among scholars who value equity in the opportunities available to young children, their families, and teachers/caregivers. The editors and authors identify and prioritize critical research areas; assess the state of the field in terms of promising research designs and methodologies; and identify capacity-building needs and potential cross-group collaborations.

A Research Agenda for Critical Literacies Hilary Janks 2026-03-20

This cutting-edge Research Agenda offers a way forward for critical literacies that takes into account current conditions of possibility. Expert contributing authors showcase innovative research that emphasises the importance of language, multimodality, place and suppressed knowledges.

Grade R in Perspective Anel Pepler 2015-12-01 Grade R in Perspective is a structured academic guide for students, educators and practitioners in the field of early child development. It is compiled according to the Curriculum and Assessment Policy Declaration (CAPS) of the National Department of Education 2011 and presents the latest tendencies of international sources. The focus is put on preparing the student to understand the principles of the informal teaching approach and to implement them. Clear directions are given to develop knowledge, skills and attitudes in the young child so that each learner can achieve self-realisation. Information is given on organising the classroom and the play area to create optimal learning opportunities for the learners. The different levels of development and cultures of the learners are taken into consideration. Valuable suggestions for teaching in practice are illustrated with appropriate examples and photos.

[Learning and Teaching Early Math](#) Douglas H. Clements 2020-12-29

The third edition of this significant and groundbreaking book summarizes current research into how young children learn mathematics and how best to develop foundational knowledge to realize more effective teaching. Using straightforward, practical language, early math experts Douglas Clements and Julie Sarama show how learning trajectories help teachers understand children's level of mathematical understanding and lead to better teaching. By focusing on the inherent delight and curiosity behind young children's mathematical reasoning, learning trajectories ultimately make teaching more joyous: helping teachers understand the varying levels of knowledge exhibited by individual students, it allows them to better meet the learning needs of all children. This thoroughly revised and contemporary third edition of Learning and Teaching Early Math remains the definitive, research-based resource to help teachers understand the learning trajectories of early mathematics and become confident, credible professionals. The new edition draws on numerous new research studies, offers expanded international examples, and includes updated illustrations throughout. This new edition is closely linked with Learning and Teaching with Learning Trajectories-[LT]2-an open-access, web-based tool for early childhood educators to learn about how children think and learn about mathematics. Head to LearningTrajectories.org for ongoing updates, interactive games, and practical tools that support classroom learning.
