Medieval Islamic Swords and Swordmaking Brian Gilmour 2012-05-30 One of the problems pervading the study of medieval Islamic technology is the lack of surviving technical treatises. Tradition tended to be handed down by example and by word of mouth, and apprenticeships could last for decades. Fortunately, however, occasional treatises do exist. The treatise "e;On swords and their kinds"e; was written by the 9th century Muslim philosopher Ya'qub ibn Ishaq al-Kindi. This work was commissioned by a powerful patron of scholarship, the Abbasid caliph Mu'tasim, and the content of the treatise presumably reflects the ruler's general interest in his army and its equipment, and his specific interest in the technical aspects of sword production. In this work, Kindi discusses the difference between iron and steel, distinguishes different qualities of sword blade, and different centres of swordsmithing. He refers to the Indian Ocean trade in steel ingots and to the distinctive character of European swords of the period. He includes technical terms used by the makers, and distinguishes swords by their physical features - form, measurements, weight, watered pattern, sculptured details, or inlaid ornaments. This publication includes the text and a translation of Kindi's treatise, and a detailed commentary on the work. The volume also includes a translation of Friedrich Schwarzlose's work on swords, which is based on the hundreds of references to swords in early Arabic poetry. Written in German, this extraordinary compendium of information was first published some 120 years ago; this volume makes it available again, and for the first time in English.

Armed with Sword and Scales Sascha Auerbach 2021-02-04 In the mid-eighteenth century, author and magistrate Henry Fielding adjudicated cases of theft, assault, and public disorder from his London home on Bow Street. By the middle of the nineteenth century, Fielding's modest 'police office' had expanded to become the most prolific court system in Britain and the cornerstone of criminal and civil justice in the metropolis. Sascha Auerbach examines the fascinating history of this institution through the lens of 'courtroom culture' - the combination of formal statute and informal custom that guided everyday practice

in the London Police Courts. He offers a new model for understanding the relationship between law, culture, and society in modern Britain and illuminates how the local courtroom became a crucial part of everyday life and thoroughly entangled with popular representations of justice and morality.
