**Political Humor Under Stalin** David Brandenberger 2009 Political Humor under Stalin is an anthology of jokes, wisecracks, and satire from the Soviet 1930s and '40s that provides a glimpse of everyday dissembling and dissent in one of the modern world's most repressive societies. More than merely a joke book, it offers no less than a folkloric counter-narrative to the official history of the USSR, as well as a groundbreaking discussion of the culture of joke-telling under Stalin.

*Humor and Aging* Lucille Nahemow 2013-09-24 Humor and Aging deals with humor throughout the life span, although primary attention is given to humor about and by the elderly. The book contains theoretical and review material from infancy to old age and includes empirical studies of death and dying in both our own and other societies. The book is divided into four parts. Part I considers theoretical models of humor development across the life span and discusses physiological, psychological, and sociological processes. Part II deals with ways of considering humor and aging from different vantage points. These include (1) humor about people of different ages; (2) humor for people of different ages; and (3) humor by people of different ages. Part III addresses the grim subject of death and dying and how it lends itself to humorous treatment in our own and other societies. Part IV contains brief empirical reports. Since scientific research in humor and aging is only beginning, it seems important to discuss pilot work in hopes that others will follow. Finally, an epilogue by Loeb and Wood presents a compelling theoretical approach.

Children's Vegetarian Culture in the Victorian Era Marzena Kubisz 2024-09-18 This book fills a unique gap in the research on the cultural history of vegetarianism and veganism, children's literature and Victorian periodicals, and it is the first publication to systematically describe the phenomenon of Victorian children's vegetarianism and its representations in literature and culture. Situated in the broad socio-literary context spanning the late nineteenth century and early twentieth century, the book lays the groundwork for contemporary children's vegan literature and argues that present ethical and environmental concerns can be traced back to the Victorian period. Following the current turn in contemporary research on children, their experience and their voices, the author examines children's vegetarian culture through

the prism of the periodicals aimed directly at them. It analyses how vegetarian principles were communicated to children and listens to the voices of children who were vegetarians, and who tested their newly formed identity in the pages of three magazines published between 1893 and 1914: *The Daisy Basket*, *The Children's Garden* and *The Children's Realm*. This book will appeal to the growing body of researchers interested in the social, cultural and literary aspects of vegetarianism and veganism, human-animal relations, childhood studies, children's literature, periodical studies and Victorian studies.
