The Electronic Republic? Phillip J. VanFossen 2008 In 1991, Lawrence Grossman wrote that 'a new political system is taking shape in the United States. As we approach the twenty-first century, America is turning into an electronic republic, a democratic system that is vastly increasing the people's day-to-day influence on decisions of state.' Grossman's forecast implied a sea change in the way citizens would interact with, and participate in, their representative government; a revamping of the way Americans would 'do' citizenship. Harnessing the power of technology to promote the ideal of democracy that first pulsed through our nation over 230 years ago may be a feasible achievement in a technocratic age, but whether technology can help achieve a revolution as seismic as the

political one that our founding fathers initiated may be a practical impossibility. Fusing the power of technology and democratic ideals opens opportunities for greater access to information and offers a medium for people to be heard and express their voice with dissemination to the masses through digital tools, such as blogs, podcasts, and wikis. Indeed, the emergence of the Internet as a nearly ubiquitous element of American society has brought about new opportunities to enhance citizen engagement in democratic politics and to increase the level of civic engagement among American citizens. Despite such rhetoric, however, research has indicated that Grossman's "electronic republic" has, for the most part, failed to come to fruition. *Outlines of civics, a suppl. to Bryce's 'American*

Understanding Your International Students

Jeffra Flaitz 2003 The one reference every school today needs to understand its students
Teaching Civics in the Library Reneé Critcher Lyons 2015-10-29 Civics education is "on the books" in all 50 states, yet civic illiteracy is widespread. Only one third of 12th graders are able to explain the significance of the Declaration of Independence, and fewer than half of 8th graders know the purpose of the Bill of Rights. This instructional guide explores the foundations of civics education--and the reasons

for its demise--with commentary from civics education leaders and scholars across the nation. Questions for eliciting civics discussion are provided for all grade levels, along with detailed civic action and service projects and reading plans. Best practices and grant writing options are included. The author argues for a return to early 20th century civics education and details the traditional and present-day role of America's libraries in developing a civic-minded populace. School and public librarians are urged to utilize trade books and carefully evaluated websites to integrate civics within educational and youth services offerings.
