Tecnología de sistemas de control Cecilio Angulo Bahón 2004 Tecnología de sistemas de control presenta la ingeniería de control que enlaza los conocimientos analíticos de la regulación con los dispositivos en el mercado para sintonizar de forma empírica, basándose en especificaciones analíticas de control. Siguiendo el esquema básico de diseño de los sistemas de control, se utiliza el entorno MATLAB para profundizar en los diferentes elementos de regulación y actuación mediante ejemplos y ejercicios prácticos. Además, se aporta información relacionada con la implementación práctica de estructuras de regulación mediante dispositivos de control, y se explica la normativa y notación estándares para facilitar la lectura de las especificaciones de los componentes. Gracias a este compromiso analítico-empírico, la presente obra resulta especialmente indicada para estudiantes de ingeniería y jóvenes graduados que buscan la sintonía entre el discurso académico de la teoría de control y su implantación sobre los lazos de control de las plantas industriales.
