Math Mammoth Grade 7

Review Workbook Maria Miller 2018-09-15 Math Mammoth Grade 7 Review Workbook is intended to give students a thorough review of pre-algebra/7th grade math. It has both topical as well as mixed (spiral) review worksheets, and includes both topical tests and a comprehensive end-of-the-year test. The tests can also be used as review worksheets, instead of tests. You can use this workbook for various purposes: for summer math practice, to keep a child from forgetting math skills during other break times, to prepare students who are going into algebra 1, or to give pre-algebra students extra practice during the school year. The topics reviewed in this workbook are: basics of algebra, integers, one-step equations, rational number, equations and inequalities, ratios and proportions, percent, geometry, the Pythagorean Theorem, probability, statistics. In addition to the topical reviews

and tests, the workbook also contains many cumulative (spiral) review pages. The content for these is taken from Math Mammoth Grade 7 Complete Curriculum. However, the content follows a typical pre-algebra course, so this workbook can be used no matter which math curriculum you follow. Please note this book does not contain lessons or instruction for the topics. It is not intended for initial teaching. It also will not work if the student needs to completely re-study these topics (the student has not learned the topics at all). For that purpose, please consider Math Mammoth Grade 7 Complete Curriculum, which has all the necessary instruction and lessons.
