Designing Modern America

Christopher Innes 2008-10-01

From the 1920s through the 1950s, two individuals, Joseph Urban and Norman Bel Geddes, did more, by far, to create the image of "America" and make it synonymous with modernity than any of their contemporaries. Urban and Bel Geddes were leading Broadway stage designers and directors who turned their prodigious talents to other projects, becoming mavericks first in industrial design and then in commercial design, fashion, architecture, and more. The two men gave shape to the most quintessential symbols of the modern American lifestyle, including movies, cars, department stores, and nightclubs, along with private homes, kitchens, stoves, fridges, magazines, and numerous household furnishings. Illustrated with

more than 130 photographs of their influential designs, this book tells the engrossing story of Urban and Bel Geddes.

Christopher Innes shows how these two men with a background in theater lent dramatic flair to everything they designed and how this theatricality gave the distinctive modernity they created such wide appeal. If the American lifestyle has been much imitated across the globe over the past fifty years, says Innes, it is due in large measure to the designs of Urban and Bel Geddes.

Together they were responsible for creating what has been called the "Golden Age" of American culture.

TWENTY-FIRST CENTURY'S FUEL SUFFICIENCY

ROADMAP STEVE ESOMBA, Dr. 2012-06-06 We badly need new sources of clean energy to generate electricity, heat and power our industries, homes and workplaces. Up to now, we have relied on and used only fossil fuels to power our industrial and domestic activities. The byproducts of fossil fuels include: irreversible pollution and contamination of our Earth, climate change, global warming, and increase in pathogenic and medication-

resistant diseases. Exhaustible fossil fuels are expensive to produce and distribute, and not everybody can afford them. Why not switch to natural, non-polluting, inexpensive, inexhaustible fuels such as solar, wind, water, etc., fuels? This is the timely message contained in TWENTY-FIRST CENTURY'S FUEL SUFFICIENCY ROADMAP. You can make this message realisable. Go on reading! Thanks.

2007-01-09 Buying a car can be a smart idea - a car loses the lion's share of its value when it is driven off the new car lot, so why let someone else take that loss? But buyer beware: A used car is likely to need more

repairs and may come with a short warranty or none at all. In addition, used cars may lack the latest safety features. That is why it is so important for consumers to do extensive research so they can avoid all of the potential pitfalls of buying a used car.
