Making a Difference:

Volume I and II Sasha A.

Barab 2017-09-05 William

Wordsworth (1770-1850) needs

little introduction as the

central figure in Romantic

poetry and a crucial influence

in the development of poetry

generally. This broad-ranging

survey redefines the variety of

his writing by showing how it

incorporates contemporary

concepts of language

difference and the ways in

which popular and serious

literature were compared and

distinguished during this

period. It discusses many of

Wordsworth's later poems,

comparing his work with that

of his regional contemporaries

as well as major writers such

as Scott. The key theme of

relationship, both between

characters within poems and

between poet and reader, is

explored through Wordsworth's

construction of community and

his use of power relationships.

A serious discussion of the

place of sexual feeling in his

writing is also included.
