Architectural Record 1910

Classical Architecture and Monuments of Washington, D.C.: A History & Guide Michael Curtis 2018 For architecture aficionados and historians, this comprehensive view of the statues, monuments and architectural plans of Washington DC provides an exciting insight into our federal city. Author Michael Curtis guides this tour of the heart of the District of Columbia's buildings, statues, and monuments. Classical design formed our nation's capital. The soaring Washington Monument, the columns of the Lincoln Memorial and the spectacular dome of the Capitol Building speak to the founders' expansive vision of our federal city. Learn about the L'Enfant and McMillan plans for Washington, D.C., and how those designs are

reflected in two hundred years of monuments, museums and representative government. View the statues of our Founding Fathers with the eye of a sculptor and gain insight into the criticism and controversies of modern additions to Washington's monumental structure.

[Birkhäuser Architectural Guide](#) Bertrand

Lemoine 2000 In the 20th century, France has proved astonishingly fertile ground for modern architecture. The architectural ideas of Modernism and the avant garde are firmly rooted here and dominate the French architectural landscape unlike in any other country. Her architects are acclaimed throughout the world. Paris, a center for international architecture, rightly forms the focus of this guidebook with more than 100 notable buildings. However, this guidebook also does justice to the entire country with more than 450 buildings from all regions. The buildings are documented with photographs, drawings and texts, providing a comprehensive and portable guide.

Confabulations : Storytelling in Architecture

Paul Emmons 2016-12-19 Confabulation is a drawing together through storytelling.

Fundamental to our perception, memory, and thought is the way we join fractured experiences to construct a narrative. Confabulations:

Storytelling in Architecture weaves together poetic ideas, objects, and events and returns you to everyday experiences of life through juxtapositions with dreams, fantasies, and hypotheticals. It follows the intellectual and creative framework of architectural cosmopoesis developed and practiced by the distinguished thinker, architect, and professor Dr. Marco Frascari, who thought deeply about the role of storytelling in architecture. Bringing together a collection of 24 essays from a diverse and respected group of scholars, this book presents

the convergence of architecture and storytelling across a broad temporal, geographic, and cultural range. Beginning with an introduction framing the topic, the book is organized along a continuous thread structured around four key areas: architecture of stories, stories of architecture, stories of theory and practice of stories. Beautifully illustrated throughout and including a 64-page full colour section, *Confabulations* is an insightful investigation into architectural narratives.
