Motorcycle Mick Walker
2006-10-02 An illustrated guide to the history of motorcycle design that profiles bikes from around the world, describes technical and stylistic innovations, and includes photographs.

Bad Love Strikes Kevin L. Schewe 2019-09-16 In October 1939, Albert Einstein warns President Franklin D. Roosevelt that Nazi Germany is actively pursuing an atomic bomb and urges him to make sure that the United States develops the bomb first. Roosevelt heeds the warning and launches the "Manhattan Project" in June 1942.

Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIA
Nigel Askey 2013-11-01
Operation Barbarossa: Volume IIA concerns the Wehrmacht. All the significant German weapon systems and combat

squads used in the campaign are analysed using the quantitative methodology detailed in Volume I, along with the contextual history. An assessment of each weapon system's inherent 'combat power' is provided, as well as attributes such as the relative anti-tank, anti-personnel and anti-aircraft values. Volume IIA then focuses on the detailed Kriegstarkenachweisungen (KStN, or TOE) for German land units (including those in the West), as well as the unit's actual organisation and equipment. All significant units in the German Army (Heer), Waffen SS, Luftwaffe and security forces are included; ranging from the largest panzer divisions, down to small anti-aircraft companies, military-police units, Landeschutzen battalions, and rail-road and construction companies. In all cases the data is presented in detailed tables, using the weapon

systems and combat squads previously analysed.

BMW R 75: And Other BMW Motorcycles in the German

Army in 1930-1945 Lukasz Gladysiak 2013-01-19 The BMW R75 is a World War II-era motorcycle and sidecar combination produced by the German company BMW. In the 1930s BMW were producing a number of popular and highly effective motorcycles. In 1938 development of the R75 started in response to a request from the German Army.

Cycle World 1993

Barbarossa Will Fowler 2004-08-23 On 22 June 1941 The Germans launched their long-expected invasion of the Soviet Union. Codenamed ""Operation Barbarossa," after the famous 12th century crusading emperor, what followed was perhaps the greatest clash of arms the world has ever witnessed. With the aid of specially commissioned maps, *Barbarossa: The First 7 Days* describes the dramatic history

of the first week of the invasion of the Soviet Union. The book begins with an extensive overview of the Wehrmacht's success up until 1941, followed by chapters outlining the German High Command's plan of attack and the defensive dispositions of the Soviet forces. The author goes on to describe the opening bombardment, followed by detailed accounts of the three Army Groups' fortunes in the first week of the campaign. The book finishes with an analysis of the remainder of the campaign and the ultimate failure of the Germans to destroy the Red Army and capture Moscow. With first hand accounts from both sides, vivid photographs, detailed fact boxes, and specially commissioned maps of the German advance and the Soviet defensive actions, *Barbarossa: The First 7 Days* is a comprehensive examination of the first week of the four-year war on the Eastern Front. *German Military Vehicles of World War II* Jean-Denis G.G. volume presents a cross-section of the most common transport vehicles produced and used by the German army. Tanks plus auxiliary vehicles such as cars, motorcycles, vans, ambulances, trucks and tractors made it possible for the troops to keep moving. These lightly armored or unarmored vehicles--aka "soft skins"--operated behind the front lines, maintaining supply lines, connecting armies with their home bases, and ultimately determining the outcome of battle. Beginning with the development of military vehicles in the early 1930s, this volume discusses the ways in which this new technology influenced and, to some extent, facilitated Hitler's program of rearmament. Nomenclature, standard equipment, camouflage and the combat roles of the various vehicles are thoroughly examined. Individual vehicle types are arranged and discussed by the following classifications: cars and motorcycles; trucks and tractors; half-tracks and

wheeled combat vehicles. Accompanied by well-researched, detailed line drawings, each section deals with a number of individual vehicles, describing their design, manufacture and specific use.

The Complete Illustrated Encyclopedia of the World's Motorcycles Erwin Tragatsch 1977 More than nine hundred photographs illustrate over two thousand alphabetically arranged entries detailing the history, technology, and performance of each bike covered and a survey of the history of the motorcycle.

WD/RE, Soko 1000, Type 97 Motorcycle, Velocette MAC (WD), Vespa 150 TAP, Welbike, Zundapp. Excerpt: The Welbike was a British single-seat motorcycle devised during World War Two at Station IX - the "Inter Services Research Bureau" - based at Welwyn, UK, for use by Special Operations Executive (SOE). It has the distinction of being the smallest motorcycle ever used by the British Armed Forces, . Between 1942 and 1943, 3,641 units (plus a prototype and some pilot models) were built and although it was not much used by the SOE, some were issued to the British 1st and 6th Airborne Divisions and some were used at Arnhem during Operation Market Garden. The Italians, Germans and Americans also developed small motorcycles for their airborne forces during World War II. The original prototype was designed by SOE motor cycle enthusiast Harry Lester, from an idea developed by * Lt. Colonel John Dolphin, the Commanding Officer of Station IX, the secret Inter-Services

Military Research Establishment based in a mansion called The Frythe (latterly owned by the pharmaceutical company GSK) an hours drive north of London near the town of Welwyn in Hertfordshire, which had been taken over for the war effort. Powered by a Villiers 98 cm single-cylinder two-stroke petrol (gasoline) engine, the Welbike was designed to fit into a standard parachute airdrop container 51 inches (130 cm), 15 inches (38 cm) high and 12 inches (30 cm) inches wide and be easily assembled and ready for use as quickly as possible. The name Welbike comes from the custom that all the clandestine equipment devised at Station IX in Welwyn had names...

years, and shows devoted to these vehicles now attract thousands of visitors. Ironically, owing to the work of restorers, collectors and enthusiasts, there are more vintage types on display and accessible to the public now than ever before. Here, Jan Suermondt offers a gallery of more than 200 photographs detailing over twenty-five period motorcycles, cars, trucks, guns, half-tracks and tanks. This stunning collection includes a full study of the legendary Tiger tank, as well as a wide range of armoured half-tracks, and will be essential reading for all those interested in German military vehicles. AUTHOR: Jan Suermondt is a photographer with a keen interest in military vehicles, and he has enjoyed unrivalled access to the Wheatcroft collection for the photographs in this book. 200 colour photos
