Vineyard Fear Philip Craig 2016-07-26 From the bestselling author of *A Vineyard Killing* comes an addition to the Martha's Vineyard Mystery Series that follows hero J.W. on his race to escape the person behind a trio of attempts to end J.W.'s life. Escaping the city and its violence, ex-cop Jeff "J. W." Jackson found solace in fishing, cooking, and simply enjoying life on Martha's Vineyard—and nothing, he figures, will ever entice him to leave. However, suddenly there's a very real possibility that his lady love Zee will be departing the idyllic island forever. And when a young student commits suicide, and a girlfriend-abusing thug starts spewing vicious threats, J. W. seriously considers a temporary escape from paradise. But it's a failed trio of attempts on his own life that ultimately propels him off-island and onto the trail of a stalker that's leading J.W. to the perilous peaks of the Colorado Rockies, where he quickly learns that, thorns and all, there's no place quite like his Vineyard home.

Hunting and Gathering on the Information Savanna Brian Clark O'Connor 2003 Serves as the focal concept in a search for a truly functional document access system, enabling us to stand back from the present, to look into the shadows of our current designs, marvel at the breadth of human search capabilities, recognize frailties in both humans and systems, and ask new questions as we grapple with navigating our

information environment. O'Connor and Copeland offer three different arenas of nontrivial information seeking for our consideration: "Submarine Chasing" explores the thoughts of a highly decorated Cold War submarine hunter. "Bounty Hunting" involves a long and convoluted search for a reported bond skipper. "Engineering Design" presents a content analysis of the few works on epistemological foundations of engineering design activity. These stories, told at great length and in considerable detail, are framed within a foundational model that links the simple act of document seeking to the broader issue of making one's way through life in the physical world. In each case, the authors ramble, mull, and stumble upon ideas without the least prior constraint, developing some threads quite fully and leaving others to tease us, but never ever throwing us to the lions.
