Navigating Through the Crisis – A special Issue on the Covid 19 Crises Silvia L. Fotea 2022-01-01 By 2020, the global economy, led by the US – China duopoly, was experiencing the longest economic expansion on record. An economic slowdown was natural, but few experts expected a triple socioeconomic crisis: a crisis in the medical sector along with a crisis in the social realm and an economic crisis. This volume provides a multifaceted perspective on the current global crises, and its socioeconomic ramifications for individuals, businesses, organizations, governments, systems and developing countries. Featuring selected papers from the 2020 Annual Griffiths School of Management and IT Conference (GSMAC), held in Oradea, Romania, this volume focuses on business, technological and ethical considerations in the process of navigating through crisis. The chapters explore diverse aspects of the sanitary crisis and its ramifications for countries and organizations. Finally, it provides diagnosis and recommendations for managerial practice in various industries impacted.

Digital Influence Warfare in the Age of Social Media James J. F. Forest 2021-09-09 Spotlights how various entities are using the Internet to shape people's perceptions and decision-making, and describes detailed case studies as well as the tools and methods used to identify automated, fake accounts. This book brings together three important dimensions of our everyday lives. First is digital-the online ecosystem of information providers and tools, from websites, blogs, discussion forums, and targeted email campaigns to social media, video streaming, and virtual reality. Second, influence-the most effective ways people can be persuaded, in order to shape their beliefs in ways that lead them to embrace one set of beliefs and reject others. And finally, warfare-wars won by the information and disinformation providers who are able to influence behavior in ways they find beneficial to their political, social, and other goals. The book provides a wide range of specific examples that illustrate the ways people are being targeted by digital influencers. There is much more to digital influence warfare than terrorist propaganda, "fake news," or Russian efforts to manipulate elections: chapters examine post-truth narratives, fabricated "alternate facts," and brainwashing and disinformation within the context of various political, scientific, security, and societal debates. The final chapters examine how new technical tools, critical thinking, and resilience can help thwart digital influence warfare efforts.
