Van Waalwijk Van Doorn-Khosrovani 2024-11-21 The rising costs of medicines is a major burden for healthcare systems and is already limiting access to innovative treatments worldwide. Governments, healthcare providers and payers constantly try to improve the sustainability of drug development, production, pricing and use of medicines. The aim of this research topic is to identify strategies and policies that can facilitate sustainable development and use of medicines as well as practical solutions to improve their cost-effectiveness. For this topic, we are also interested in alternative pricing strategies and financial arrangements, requisite changes in regulatory and legal frameworks to support sustainability, the potential role of registries, real-world evidence and biomarker development for clinical daily use. The submissions (Original research/Reviews/Mini-reviews/Perspectives/Clinical Studies) may refer to, but are not limited to, manuscripts

involving: 1. Dose-rounding, dose-banding or vial-sharing to minimise the wasting of expensive medicines 2. Alternative dosing strategies, such as tapering and/or increasing the dose-interval or shortening treatment duration 3. Boosting potency of drugs 4. The use of predictive biomarkers that can prevent mis-prescribing and overuse of therapies 5. Extrapolation of one of the strategies mentioned above (1-4) to other disease areas. We are also especially interested in disease-agnostic studies and approaches 6. Alternative pricing strategies and financial arrangements 7. Role of registries and real-world evidence in sustainable drugs use and development 8. Improvement of regulatory and legal frameworks and policies for sustainable medicine development 9. Addressing cost-effectiveness of medicines by efficient use of resources and improving processes 10. Sustainable development of medicines through Public private partnerships 11. Development of biomarkers for

selection and monitoring of patients and therapies to ensure optimal (personalised) treatments 12. Addressing our conflicting interests: a substantial part of pharmaceutical companies is owned by public or semi-public investors (pension funds, state-owned banks etc.). As pension plan contributors and tax payers we benefit directly from the high prices of medicines, while at the same time access to the same medicines can be denied to us. How can we reshape the system?

Conquer the NHA-CPCT/A Exam Philip Martin McCaulay 2024-08-17 This guide is tailored to help you succeed on the NHA-CPCT/A exam, focusing on the key areas of patient care. It covers roles and responsibilities, basic and advanced patient care techniques, infection control, and patient safety. The guide also provides insights into effective communication, medical terminology, phlebotomy, EKG, and emergency procedures. Legal and ethical considerations,

quality assurance, and career development are thoroughly addressed. This resource ensures comprehensive preparation for the exam and a successful career as a Certified Patient Care Technician/Assistant.
