Climate Change in the European Alps Shardul Agrawala 2007-01-22 This report assesses the implications of climate change on winter tourism and natural hazards management in the European Alps, with a particular focus on how these activities can adapt to climate change. The report presents the first systematic cross-country analysis of the effects of climate change on snow-reliability in the European Alps. It also examines the implications of climate change for a range of natural hazards prevalent in the Alps, with a particular focus on frameworks and financial mechanisms to manage natural hazards in three countries: France, Switzerland and Austria. Technological and behavioural adaptation measures, together with institutional structures and risk transfer mechanisms, are also reviewed.

Climate Change and Its Implications 2007 This publication highlights key issues of relevance for climate change and poverty reduction and provides recommendations for Commonwealth Finance Ministers and Commonwealth Heads of Government. The ideas presented here come from civil society organisations, and form a background paper to a pan-Commonwealth civil society consultation process in Georgetown, Guyana, held before the 2007 Commonwealth Finance Ministers Meeting. The concluding statement of the civil society consultation is also presented.

Solving the Climate Puzzle Javier Vinós 2023-11-01 Climate change is the most important scientific issue of our time, catalyzing a profound societal shift based on our perceived understanding of it. While many books explain what we already know about climate change, this book explores what we admit we do not understand about it. In doing so, it reveals a previously overlooked mechanism of climate change, one that operates in the background and eludes the scrutiny of prevailing climate theories and models.

Astonishingly, this phenomenon is clearly evident in numerous climate studies, casting a new light on climate change that warrants a critical reevaluation of many of the conclusions presented in the IPCC Assessment Reports. Regardless of your position on climate change or your familiarity with the underlying science, this book offers a wealth of knowledge and a profound shift in your understanding of the dynamics that govern climate variability. With 134 illustrations (black and white in the paperback edition), this book aims to make climate science accessible to a broad audience, and only you, the reader, can ultimately determine the extent to which it succeeds in this goal.

Global Warming Ernesto Zedillo Ponce de León 2008 "Comprehensive examination of the economic, social, and political context of climate policy in industrialized and developing nations. Calls for a multilateral approach that goes beyond the mitigation-focused Kyoto policies and stresses the importance of generating policies that work within a time frame commensurate with that of climate change itself"-- Provided by publisher.

Climate Change 2014 - Impacts, Adaptation and Vulnerability: Part A: Global and Sectoral Aspects: Volume 1, Global and Sectoral Aspects Intergovernmental Panel on Climate Change (IPCC) 2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC)

will again form the standard reference for all those concerned with climate change and its consequences, including students, researchers and policy makers in environmental science, meteorology, climatology, biology, ecology, atmospheric chemistry and environmental policy.

Livelihood Adaptation to Climate Variability and Change in Drought-prone Areas of Bangladesh Food and Agriculture Organization of the United Nations 2006 The impacts of climate variability and change are global concerns but in Bangladesh they are particularly critical. FAO and the Asian Disaster Preparedness Centre are guiding a project to assess livelihood adaptation to climate variability and change in the drought-prone areas of Northwest Bangladesh. It covers: the characterisation of livelihood systems; profiling of vulnerable groups; assessment of past and current climate impacts; and understanding of local perceptions of climate impacts, local coping capacities and existing adaptation strategies. It also is developing a good practice adaptation option menu, evaluating and field testing locally selected options, and introducing long-lead climate forecasting, capacity building and training of Department of Agricultural Extension staff and community representatives. This report summarises the project methodology and discusses interim findings and recommendations.

Climate Variability and Change and Sea-level Rise in the Pacific Islands Region John E. Hay 2003
Migration, Environment and Climate Change Frank Laczko 2009 Gradual and sudden environmental changes are resulting in substantial human movement and displacement, and the scale of such flows, both internal and cross-border, is expected to rise with unprecedented impacts on lives and livelihoods. Despite the potential challenge, there has been a lack of strategic thinking about this policy area partly due to a lack of data and empirical research on this topic. Adequately planning for and managing environmentally induced migration will be critical for human security. The papers in this volume were first presented at the Research Workshop on Migration and the Environment: Developing a Global Research Agenda held in Munich, Germany in April 2008. One of the key objectives on the Munich workshop was to address the need for more sound empirical research and identify priority areas of research for policy makers in the field of migration and the environment.

Bridge Over Troubled Waters: Linking Climate Change and Development Organisation for Economic Co-operation and Development 2005-11-17 Synthesises insights from six country case studies that review climate change impacts, analyse relevant national plans and aid investments in terms of climate risks, and examine key systems where climate change is closely intertwined with development.

Climate Change 2014 - Impacts, Adaptation and Vulnerability: Regional Aspects Christopher B. Field 2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) will again form the standard reference for all those concerned with climate change and its consequences, including students, researchers and policy makers in environmental science, meteorology, climatology, biology, ecology, atmospheric chemistry and environmental policy.

Climate Change, Human Security and Violent Conflict Jürgen Scheffran 2012-05-26 Severe droughts, damaging floods and mass migration: Climate change is becoming a focal point for security and conflict research and a challenge for the world's governance structures. But how severe are the security risks and conflict potentials of climate change? Could global warming trigger a sequence of events leading to economic decline, social unrest and political instability? What are the causal relationships between resource scarcity and violent conflict? This book brings together international experts to explore these questions using in-depth case studies from around the world. Furthermore, the authors discuss strategies, institutions and cooperative approaches to stabilize the climate-society interaction.
