Animal Law Worldwide Federico Dalpane
2024-11-18 This book offers a unique panoramic survey of the state of animal law in twenty-six countries and in the legal system of the European Union. The authors give a brief introduction to each jurisdiction, examine key issues, and formulate recommendations. The

contributions provide ample opportunities for legal comparative studies touching on constitutional law, criminal law, civil law, environmental law, and administrative law, and discuss the crucial role of NGOs and civil society in raising awareness for the plight of animals. The contributions show the mature stage reached by the discipline of animal law, which is gaining attention in wider circles. The book discusses wildlife, agricultural animals, experimental animals, service animals, stray animals, and others. One of the topics is the constitutionalisation of animal welfare (with a growing number of countries amending their constitutions to include the protection of animals or considering such amendments). Other topics include the trend of moving away from the age-old legal classification of animals as mere things, and the persistent weaknesses in the implementation of legal provisions for the protection of animals. This book will be of keen interest to the worldwide animal law community,

Transformative Feminisms Kerry Greaves 2026-03-02 This is the first major publication in any language to re-evaluate the problematics that enmesh feminism, gender, and contemporary Nordic art. The book probes the shifting nature of the "Nordic" to challenge its popular image as liberal when it comes to genders, sexualities, and ethnicities. It questions the so-called wave model to suggest instead a history of sporadic (re)surfacings and submersions of feminism's impact on Nordic art over the last sixty years. The intersectional, transhistorical, and transcultural focus nuances the Nordic and demystifies common tropes while reflecting the principal concerns of feminist art

scholars working today: the welfare model; gender, sexuality, and the body; transculturality and decolonialization, and posthuman feminism and glitches. Vigorously intervenes in and re-evaluates the problematics enmeshing feminism, gender, and contemporary Nordic art With a special focus on decolonialism and transculturality

Where Have All the Horses Gone? Jonathan V. Levin 2017-07-19 A century ago, horses were ubiquitous in America. They plowed the fields, transported people and goods within and between cities and herded livestock. About a million of them were shipped overseas to serve in World War I. Equine related industries employed vast numbers of stable workers, farriers, wainwrights, harness makers and teamsters. Cities were ringed with fodder-producing farmland, and five-story stables occupied prime real estate in Manhattan. Then, in just a few decades, the horses vanished in a wave of emerging technologies. Those technologies fostered unprecedented economic growth, and with it a culture of recreation and leisure that opened a new place for the horse as an athletic teammate and social companion.
