Otto E. Miller, Plaintiff-Respondent, Against Fred W. Smythe, Defendant-Appellant Mathematics Education for a Changing World  
Stephen S. Willoughby 1990 A discussion of mathematics curriculum and teaching methods based on the standards issued by the National Council of Teachers of Mathematics (NCTM) and National Council of Supervisors of Mathematics (NCSM) is presented. The standards emphasize the connectedness of each of the branches of mathematics and underline the relationship of each branch to science and technology. The standards also propose teaching estimation, graphing, statistics, and probability at earlier stages than is now common. This text turns these new standards into a practical reality for teachers and administrators. Chapters include: (1) "Why Change?"; (2) "Recent Recommendations of Professional Groups"; (3) "Implementing Recommendations"; (4) "Problem Solving"; (5) "Technological Developments"; (6) "Connections"; and (7) "Fostering Change." First of all, we want to congratulate two new research communities from Mexico and Brazil that have recently joined the Iberoamerican community and the International Association for Pattern Recognition. We believe that the series of congresses that started as the "Taller Iberoamericano de Reconocimiento de Patrones (TIARP)", and later became the "Iberoamerican Congress on Pattern Recognition (CIARP)", has contributed to these group consolidations.

We hope that in the near future all the Iberoamerican countries will have their own groups and associations to promote our areas of interest; and that these congresses will serve as the forum for scientific research exchange, sharing of expertise and new knowledge, and establishing contacts that improve cooperation between research groups in pattern recognition and related areas. CIARP 2004 (9th Iberoamerican Congress on Pattern Recognition) was the

ninth in a series of pioneering congresses on pattern recognition in the Iberoamerican community. As in the previous year, CIARP 2004 also included worldwide participation. It took place in Puebla,

Mexico. The aim of the congress was to promote and disseminate ongoing research and mathematical methods for pattern recognition, image analysis, and applications in such diverse areas as computer vision, robotics, industry, health, entertainment, space exploration, telecommunications, data mining, document analysis, and natural language processing and recognition, to name a few.
