The Well-Trained Mind Susan Wise Bauer 2009-05-04 "Outstanding... should be on every home educator's reference bookshelf." -- Homeschooling Today This educational bestseller has dominated its field for the last decade, sparking a homeschooling movement that has only continued to grow. It will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school. Two veteran home educators outline the classical pattern of education -- the trivium -- which organizes learning around the maturing capacity of the child's mind. With this model, you will be able to instruct your child in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Newly revised and updated, The Well-Trained Mind includes detailed book lists with complete ordering information; up-to-date listings of resources, publications, and Internet links; and useful contact information.

Pre-Algebra James Van Dyke 1997-12 This one semester prealgebra text bridges the gap between arithmetic and beginning algebra and is suitable for a variety of course formats, including lab (both supervised and self-placed) lecture, group, and a combination of all three. With a heavy emphasis on important study skills and habit, this work aims to instill mathematical confidence and help build a solid foundation for students going on the future maths courses. This text provides a treatment of algebra and arithmetic, allowing students to better understand the relationship between the two. Group activities, scientific calculator exercises, critical thinking problems and exercises requiring written answers are included throughout the text, in accordance with NCTM guidelines.
