Interactive Science Activity Workbooks
Homeschool Activities Workbook includes: ·
Activities Workbook About the Program
Interactive Science Activity Workbooks develop the skills necessary for children to truly understand science concepts with: · Fun, educational activities for kids · Opportunities for kids to create their own experiments · Easy, step-by-step instructions for kids to complete experiments at home Key Points/Program Differentiators · Customized for at-home use · Individual attention · Uses easy-to-find materials · Visually engaging and fun to use Program Overview The Interactive Science Activities workbooks are designed for the home environment, and modified from the lengthy lab manuals used in schools. They are custom designed at-home activities for students and parents to use on their own or with the Interactive Science grade-level bundles. The Pearson at Home Interactive Science Activities workbooks provide children with a student-centered approach to scientific discovery. Each hands-on activity presents a child with a challenging question that can be investigated and explored independently or with parent guidance. As part of the directed inquiry process, the child will answer this question by exploring the resources, following the outlined procedures of each activity, collecting data, and drawing conclusions. In some instances, parents might need to help children with certain parts of the activity. Following the directed inquiry, the child will be given an opportunity to expand and demonstrate scientific reasoning by modifying the investigation and designing his or her own experiments to illustrate the concept. Utilizing these activities will encourage every child to think like a scientist and encourage him or her to be inquisitive. This curriculum has been modified specifically for homeschool families. At times, there may be references to print or digital

components that are not included within the homeschool bundle. This will not hinder your child's successful completion of the course.

The World of Science Education 2019-02-11

Each volume in the 7-volume series *The World of Science Education* reviews research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia and New Zealand, Europe and Israel, North Africa and the Middle East, and Sub-Saharan Africa. The focus of this Handbook is on North American (Canada, US) science education and the scholarship that most closely supports this program. The reviews of the research

situate what has been accomplished within a given field in North American rather than international context. The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education. The thrust lies in identifying the roots of research programs and sketching trajectories—focusing the changing façade of problems and solutions within regional contexts. The approach allows readers review what has been done and accomplished, what is missing, and what might be done next.

Proceedings of the Jepara International Conference on Education and Social Science 2024 (JIC 2024) Agus Subhan Akbar 2025-12-16
This is an open access book. Jepara International Conference (JIC) is an international conference held annually in Jepara, Indonesia. The conference aims to bring together scholars, researchers, and practitioners from around the world to discuss and share their latest findings on a variety of topics related to sustainable development, education, and digital society. The theme of the 2024 JIC is "The Sustainable Technology of Coastal Development, Advance Education and Digital Society". This theme is particularly relevant to Jepara, a city located on the north coast of Java Island. Jepara is facing a number of challenges related to coastal erosion, climate change, and the need to improve education and digital literacy. The JIC will provide a forum for discussing these challenges and identifying innovative solutions. The JIC will feature a number of keynote presentations, panel discussions, and paper presentations. There will also be opportunities for networking and collaboration among participants.
