Enacting Research Methods in Information Systems: Volume 3

Leslie P. Willcocks 2016-05-20 This edited three volume edition brings

together significant papers previously published in the Journal of

information Technology (JIT) over its 30 year publication history. The

three volumes of Enacting Research Methods in Information Systems

celebrate the methodological pluralism used to advance our

understanding of information technology's role in the world today. In

addition to quantitative methods from the positivist tradition, JIT also

values methodological articles from critical research perspectives,

interpretive traditions, historical perspectives, grounded theory, and

action research and design science approaches. Volume 1 covers Critical

Research, Grounded Theory, and Historical Approaches. Volume 2 deals

with Interpretive Approaches and also explores Action Research. Volume

3 focuses on Design Science Approaches and discusses Alternative

Approaches including Semiotics Research, Complexity Theory and

Gender in IS Research. The Journal of Information Technology (JIT) was

started in 1986 by Professors Frank Land and Igor Aleksander with the

aim of bringing technology and management together and bridging the

'great divide' between the two disciplines. The Journal was created with

the vision of making the impact of complex interactions and

developments in technology more accessible to a wider audience.

Retaining this initial focus, the JIT has gone on to extend into new and

innovative areas of research such as the launch of JITTTC in 2010. A high

impact journal, JIT shall continue to publish leading trends based on

significant research in the field.
