[Educational Policy Borrowing in China](#) Charlene Tan 2016-02-22 For over a decade, Mainland China has been embarking on an ambitious nation-wide education reform ('New Curriculum Reform') for its basic education. The reform reflects China's propensity to borrow selected educational policies from elsewhere, particularly North America and Europe. Chinese scholars have used a local proverb "the West wind has overpowered the East wind" to describe this phenomenon of 'looking West'. But what do we mean by educational policy borrowing from the West? What are the educational policies in China's new curriculum reform that are perceived to be borrowed from the West? To what extent have the borrowed educational policies in China's new curriculum reform been accepted, modified, and rejected by the various educational stakeholders? How does culture influence the various educational stakeholders in China in interpreting and mediating educational policy borrowing from the West? How do the findings of this study on China's education reform inform and add to the existing theories on and approaches to on cross-cultural educational policy borrowing? This book answers the above questions by critically discussing China's policy borrowing from the West through its current reform for primary and secondary education. It presents the latest in-depth research findings from a three-year empirical study (2013-2015) with school principals, teachers, students and other educational stakeholders across China. This study offers new insights into China's educational policy borrowing from the West and international implications on cross-cultural educational transfer for academics, policymakers and educators.

Women's Under-Representation in the Engineering and Computing Professions: Fresh Perspectives on a Complex Problem Kathleen Buse 2018-06-21 Understanding the many complexities that define gender inequality has been described by researchers as a grand challenge. Novel insights, innovation, a broader community to conduct research and to ascertain effective interventions are essential in the challenge to create organizations that are gender equal. As such, this Research Topic in *Frontiers in Psychology* addresses the under-representation of women in engineering and computing as a complex, but solvable problem. This Research Topic seeks to inform the global community about advances in understanding the under-representation of women in engineering and computing with a focus on what enables change. Further, this Topic will promote fresh perspectives, innovative methodologies, and mixed method approaches important to accelerating the pace of change.

[Climate Change 2021 - The Physical Science Basis](#) Intergovernmental Panel on Climate Change (IPCC)

2023-07-26 The Working Group I contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) provides a comprehensive assessment of the physical science basis of climate change. It considers in situ and remote observations; paleoclimate information; understanding of climate drivers and physical, chemical, and biological processes and feedbacks; global and regional climate modelling; advances in methods of analyses; and insights from climate services. It assesses the current state of the climate; human influence on climate in all regions; future climate change including sea level rise; global warming effects including extremes; climate information for risk assessment and regional adaptation; limiting climate change by reaching net zero carbon dioxide emissions and reducing other greenhouse gas emissions; and benefits for air quality. The report serves policymakers, decision makers, stakeholders, and all interested parties with the latest policy-relevant information on climate change.

Climate Policy after the 2015 Paris Climate Conference Joanna Depledge 2021-12-14 The 2015 Paris Agreement marked a turning point in the global community's response to climate change. For the first time, almost all the world's nations put forward specific pledges to cut their greenhouse gas emissions with the aim of limiting global warming to well below 2°C, and ideally 1.5°C. The ten contributions in *Climate Policy after the 2015 Paris Climate Conference* provide a powerful and scholarly analysis of how this historic achievement came about. With a new introduction providing an update on recent developments, the other chapters in this book were originally published as a special issue of the journal, *Climate Policy*.
