Academic Literacy and the Nature of Expertise Cheryl Geisler 2013-11-05 The first full-length account integrating both the cognitive and sociological aspects of reading and writing in the academy, this unique volume covers educational research on reading and writing, rhetorical research on writing in the disciplines, cognitive research on expertise in ill-defined problems, and sociological and historical research on the professions. The author produced this volume as a result of a research program aimed at understanding the relationship between two concepts -- literacy and expertise -- which traditionally

have been treated as quite separate phenomena. A burgeoning literature on reading and writing in the academy has begun to indicate fairly consistent patterns in how students acquire literacy practices. This literature shows, furthermore, that what students do is quite distinct from what experts do. While many have used these results as a starting point for teaching students "how to be expert," the author has chosen instead to ask about the interrelationship between expert and novice practice, seeing them both as two sides of the same project: a cultural-historical "professionalization project" aimed at establishing and preserving the professional privilege. The consequences of this "professionalization project" are examined using the discipline of academic philosophy as the "site" for the author's investigations.

Methodologically unique, these investigations combine rhetorical analysis, protocol analysis, and the analysis of classroom discourse. The result is a complex portrait of how the participants in this humanistic discipline use their academic literacy practices to construct and reconstruct a great divide between expert and lay knowledge. This monograph thus extends our current understanding of the rhetoric of the professions and examines its implications for education.

**Making a Difference:  
Volume I and II** Sasha A.  
Barab 2017-09-05 William  
Wordsworth (1770-1850) needs  
little introduction as the  
central figure in Romantic  
poetry and a crucial influence  
in the development of poetry  
generally. This broad-ranging

survey redefines the variety of  
his writing by showing how it  
incorporates contemporary  
concepts of language  
difference and the ways in  
which popular and serious  
literature were compared and  
distinguished during this  
period. It discusses many of  
Wordsworth's later poems,  
comparing his work with that  
of his regional contemporaries  
as well as major writers such  
as Scott. The key theme of  
relationship, both between  
characters within poems and  
between poet and reader, is  
explored through Wordsworth's  
construction of community and  
his use of power relationships.  
A serious discussion of the  
place of sexual feeling in his  
writing is also included.

[Neuropsychological Testing:  
From Psychometrics to Clinical  
Neuropsychology](#) Alessio  
Facchin 2025-02-10  
Neuropsychological testing  
represents an essential part of  
the clinical examination of

neuropsychological patients, and these measures remain the primary instrument for clinical research in neuropsychology. For these reasons, old procedures were psychometrically investigated to assess their metrical properties. As a result of the redesigned procedures, old tests were improved in terms of their psychometric properties and characteristics. The field of neuropsychological testing needs to be updated with new research in order to improve the clinical practice of neuropsychological testing, the psychometric characteristics of new neuropsychological tests, and the theories behind the testing in a circular way. In this research topic we want to report recent advances and changes from old standard diagnostic testing to more recent procedures and methods in the area of cognitive testing. Applications, comparisons, novel definitions and measures, updated procedures and psychometric properties of existing instruments, measurement invariance,

reliability, repeatability, specific norms, particular applications and use in specific patients are all welcome. Open access tests, methods and procedures are encouraged, together with studies that follow the Open Science initiative. This topic joins two different backgrounds in this area of research: psychometrics and neuropsychology and all studies in these areas will be considered included reviews and meta-analyses.

**Current Issues in Bilingualism** Mark Leikin  
2011-11-22 As populations become more mobile, so interest grows in bi- and multilingualism, particularly in the context of education. This

volume focuses on the singular situation in Israel, whose complex multiculturalism has Hebrew and Arabic as official languages, English as an academic and political language, and tongues such as Russian and Amharic spoken by immigrants. Presenting research on bi- and trilingualism in Israel from a multitude of perspectives, the book focuses on four aspects of multilingualism and literacy in Israel: Arabic-Hebrew bilingual education and Arabic literacy development; second-language Hebrew literacy among immigrant children; literacy in English as a second/third language; and adult bilingualism. Chapters dissect findings on immigrant youth education, language impairment in bilinguals, and neurocognitive features of bilingual language processing. Reflecting current trends, this volume integrates linguistics, sociology, education, cognitive science, and neuroscience.
