Text Book of Computer Applications and Biostatistics Satish B Bhise 2011-01-15 We are very pleased to put forth the first edition of book, 'Textbook of Computer Applications and Biostatistics'. This book is intended to be an introduction to pharmacy students regarding applications of computers and biostatistics to pharmacy. The basic knowledge of computers and their applications is covered in details as it is essential to students in every walk of their lives. The procedures for operating Windows 2003 is discussed here as many colleges still use this version. However our second edition will have the procedures for operating latest versions of Windows. We regret for inconvenience caused to few readers, due to this. The concepts of biostatistics are discussed here with minimum of maths, so as to drive away the maths phobia in pharmacy students. Moreover, most of the statistics can be handled through computers using excel and we have emphasized in every chapter on how to use computers for statistical needs. This will help students to handle the data and infer about their experiments easily. This book is an sincere effort to bring statistical concepts in simple, understandable form so that every student will enjoy to learn them with ease. The learning objectives, summary, multiple choice questions and exercise in all twenty two chapters makes the book more interesting. We acknowledge the help and co-operation extended by various persons in bringing out this book. We are highly indebted to the authors of the various books and articles mentioned in bibliography which became a major source of information for writing this book. We also thank the publishers and designers who graciously worked hard to publish this book in time. Our request to all users of this book is to provide constructive criticism in

improving further editions of the book. We sincerely hope that readers will certainly welcome the book.

Business Management of Railway Stations K.V.Rao IRTS 2021-09-07 The "Business Management of Railway Stations" will help and guide the officers and staff of both government as well as private railways' working at stations, sidings and on trains to further improve the business of railways and services to the people. It is also useful to passengers, freight customers, contractors, rail users, students, academicians, and the general public.

CASES IN MANAGEMENT INFORMATION SYSTEMS MOHAPATRA, SANJAY 2008-01-01 This book is intended as a supplement for courses in Management Information Systems (MIS). It uses cases to explain MIS concepts. It illustrates how computer-based information systems can be used to support an organization's objectives and strategic plans. The book's objective is to capture the material from a wide range of sectors such as health care, developmental activities, bank operations, microfinance, etc. and organize it around a framework that would be useful for students to understand how MIS can help in overcoming corporate challenges. It prepares students as managers, providing a clear focus on information, rather than data, and its use in business. These cases can also be used by practitioners as examples for designing MIS in their own organizations. For each case, the costs and benefits of the information system have been evaluated by calculating the Return on Investment (ROI). What is more, not only quantitative benefits, but also qualitative benefits (social and public benefits) have been identified to justify the need for technology-enabled MIS for supporting corporate strategies and operations. The book would be useful to students of MBA, BE (ICT), MCA and M.Sc. (Computer Science) courses. Besides, it would be of benefit to senior executives participating in Management Development Programmes.

Envisioning the Futures - Designing and Building for People and the Environment Rossano Albatici 2025-11-29 This book gathers the

proceedings of the 12th International Conference of Ar.Tec. (Scientific Society of Architectural Engineering), Colloqui.AT.e, which was held in Trento, Italy on June 11-14, 2025, and brought together scholars in the fields of construction and conservation history, building construction and performance, building design, and technologies. Digital transition and design of 4.0 buildings, digital twins for the management of historical building heritage, building-human-environment relationships, and mitigation of vulnerabilities for the preservation of the built environment are also explored. The contributions demonstrate that architectural engineering enables the construction of sustainable, resilient, adaptive, and high-performance buildings, and as such is instrumental in fighting against climate change.

Corporate Governance in India - Challenges Ram K Narayan 2021-06-11 Foreword note for the book is by Mr. Shailesh Haribhakti, Chartered Accountant - the only Indian to receive the Global Competent Board's Certification declaring him as ESG ready. He is also a winner of several corporate governance awards including the best Independent Director. He is a fellow of IOD. Unique feature of the book lies in the elaboration of the role of IDs and committees of board; templates for mandatory codes, policies, and reports - both incorporating requirements under SEBI Regulations/Act. Despite India having the best Corporate Governance framework the corporate frauds that keep surfacing underlines that the IDs and Auditors are yet to become independent in letter and spirit. Case of a listed PSU which failed to discharge fiduciary responsibilities leading to end of a good project and loss of huge public funds is also covered in the book.
