Handbook of Second Language Assessment Dina Tsagari 2016-03-07 Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment with chapters on the purposes of assessment, and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language assessment on a national scale, there are chapters on learning-oriented assessment, as well as the uses of second language assessment in the workplace and for migration. Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of 'voice' in second language assessment, and assessment literacy for teachers and other test and score users.

The Routledge Handbook of Second Language Acquisition and Language Testing Paula Winke 2020-12-27 This Handbook, with 45 chapters written by the world's leading scholars in second language acquisition (SLA) and language testing, dives into the important interface between SLA and language testing: shared ground where researchers seek to measure second language performance to better understand how people learn their second languages. The Handbook also reviews how to best measure and evaluate the second language (L2) learners' personal characteristics, backgrounds, and learning contexts to better understand their L2 learning trajectories. Taking a transdisciplinary approach to research, the book builds upon recent theorizing and measurement principles from the fields of applied linguistics, cognitive science, psychology, psycholinguistics, psychometrics, educational measurement, and social psychology. The Handbook is divided into six key sections: (1) Assessment concepts for SLA researchers, (2) Building instruments for SLA research, (3) Measuring individual differences, (4) Measuring language development, (5) Testing specific populations, and (6) Measurement principles for SLA researchers.

High-Stakes Testing David Coniam 2018-10-24 This book provides a detailed account of the origin, development, administration, revision and subsequent research findings on the benchmarking initiative from 1996-2016. It presents an overall assessment of the initiative's impact on major stakeholders, predictions regarding the way forward, and implications for other countries, especially in South East Asia. In addition, the book discusses what the larger global community can learn from Hong Kong's two-decade experience of conceptualizing and implementing minimum standard language requirements for teachers.

Language is the Key Monika Jezak 2017-06-06 The CLB/NCLC success was dependent on many factors—outstanding work by leading Canadian scholars; steady commitment of the government and non-governmental stakeholders at the federal, provincial, and local level; and, last but not least, unconditional commitment and caring on the part of an invested community of practice. Language is the key covers a range of topics: historical and political context that lead to the development of the Canadian standards, their current positioning in global educational markets, as well as their research and teaching cultures. This edited

volume provides a comprehensive overview of recent and ongoing projects and of CLB- and NCLC-related materials, tools and resources for teaching and assessment. Finally, it offers a bold outlook, proposing various scenarios to branch out beyond these benchmarks into the domains of higher education, essential skills, literacy, workplace training, as well as international and indigenous languages. The 20th anniversary of the CLB/NCLC provides an opportunity to reflect on the scope and importance of this exceptional Canadian intellectual product. Published in English.

Foreign Language Assessment in Grades K-8 1997 The annotated bibliography describes foreign language assessment instruments currently used in elementary and middle schools. The instruments are drawn from a wide variety of program models: Foreign Language in the Elementary School (FLES), middle school sequential instruction, and immersion (total, two-way, partial). The bibliography has six sections: assessment instruments; program evaluation instruments; classroom assessment activities; sample assessment instruments; selected related resources; and selected commercially available language tests. An index of instruments according to purpose, language, and grade level is included. Descriptions of assessment instruments and activities and sample assessments were collected from teachers, schools, school districts, state education offices, and educational research organizations. In each section, materials are listed in alphabetical order according to language. The major emphasis is on French, German, Italian, Japanese, and Spanish. Also included are Arabic, Catalan, Chinese, Chuukese (Lagoon), Gallego, Haitian-Creole, Indonesian, Korean, Latin, Modern Greek, Navajo, Palauan, Pohnpeian, Portuguese, Russian, Tagalog, and Welsh. Each entry includes information on availability, current users, language program type, intended grade level, intended test use, skills tested, test author, publications date, test cost, length, test materials, format, scoring method, a description, test development and technical information, parallel versions in other languages, and a contact person. An introductory section gives an overview of the bibliography's contents and notes on selecting an assessment instrument. (MSE)
