Meeting the Challenges to Measurement in an Era of Accountability

Henry Braun 2016-01-29 Under pressure and support from the federal government, states have increasingly turned to indicators based on student test scores to evaluate teachers and schools, as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests, such as in mathematics or English/language arts with a focus on grades 4-8. Teachers in these subject areas, however, constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas, with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests, as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. Anticipate the School You Want Arthur Shostak 2008-08-16 Across America, especially in the aftermath of 9/11, parents rely on K12 schooling to prepare their children for the shocks, the perils, and especially the bright possibilities that are part of our warp-speed future. A new generation of school staffers is forging a fresh learning partnership with youngsters for whom creative computer-based schooling is as natural as breathing. Together, these staffers and students seek empowering ways to draw on futuristics, a pedagogy that makes the most of the study of tomorrow. *Anticipate the School You Want* offers pragmatic program ideas, along with many operational hints. Additionally, it shares a blueprint for developing the nation's first high school of the future and a design for conducting a biannual Futures Fair. America urgently needs an educational pathway for developing long-range forecasters, and Shostak provides recommendations for reaching that pathway. Strengthened by numerous annotated citations for articles, books, and Web sites, the book enables school staffers to draw on futuristics as they have always wanted to-ably, confidently, and with confidence that it makes a desirable, lasting difference.
