**Information Services Today**

Sandra Hirsh 2015-03-19 This essential overview of what it means to be a library and information professional today provides a broad overview of the transformation of libraries as information organizations, why these organizations are more important today than ever before, the technological influence on how we provide information resources and services in today's digital and global environment, and the various career opportunities available for information professionals. The book begins with a historical overview of libraries and their transformation as information and technology hubs within their communities. It also covers the various

specializations within the field emphasizing the exciting yet complex roles and opportunities for information professionals. With that foundation in place, it presents how libraries serve different kinds of communities, highlighting the unique needs of users across all ages and how libraries fulfill those needs through a variety of services, and addresses key issues facing information organizations as they meet user needs in the Digital Age. The book then concludes with career management strategies to guide library and information science professionals in building not only vibrant careers but vibrant information organizations for the future as well.

**Colleen Moore** Jeff Codori 2012-03-13 Colleen Moore (1899-1988) was one of the most popular and beloved stars of the American silent screen. Remembered primarily as a comedienne in such films as *Ella Cinders* (1926) and *Orchids and Ermine* (1927), Moore's career was also filled with dramatic roles that often reflected societal trends. A trailblazing performer, her legacy was somewhat overshadowed by the female stars that followed her, notably

Louise Brooks and Clara Bow. An in-depth examination of Moore's early life and film career, the book reveals the ways in which her family and the times in which she lived influenced the roles she chose. Included are forewords written by film historian Joseph Yranski, a friend of the actress, and by Moore's stepdaughter, Judith Hargrave Coleman.

*The Routledge Handbook of Classics, Colonialism, and Postcolonial Theory* Katherine Blouin 2024-07-29 This handbook explores the ways in which histories of colonialism and postcolonial thought and theory cast light on our understanding of the ancient Mediterranean world and the discipline of Classics, utilizing

a wide body of case studies and providing avenues for future research and discussion. It brings together chapters by a wide, international, and intersectional range of scholars coming from a variety of backgrounds and sub-disciplinary perspectives, and from across the chronological and geographical scope of Classics. Chapters cover the state of current research into ancient Mediterranean and South, Central, and West Asian histories. They provide case studies to illustrate both how postcolonial thought has already illuminated our understanding of the ancient Mediterranean world and beyond, as well as its potential for the future. Chapters also provide opportunities for reflection on the current state of the discipline. An introduction by the volume editors offers a survey of the development of postcolonial theory, its relationship to other bodies of theory, and its connections to Classics. Toward the end of the book, three scholars with different

career and disciplinary perspectives provide short reflections on the themes of the volume and the directions of future research. The Routledge Handbook of Classics, Colonialism, and Postcolonial Theory offers an impressive collection of current research and thought on the subject for students and scholars in classical studies understood in its larger sense as well as in related disciplines such as Archaeology, Ancient History, Imperial History and the History of Colonialism, Reception Studies, and Museum Studies. For anyone interested in classical antiquity, it provides an engaging introduction to a potentially bewildering, but ultimately vital and enriching, body of thought and theory.

Structural Inequalities and Health Outcomes for Chronic

Disease Leonard E. Egede

2025-05-23 Structural Inequalities and Health Outcomes for Chronic Disease provides a conceptual framework for understanding existing evidence and guides the research around promising interventions and policies. In addition, it demonstrates how structural inequalities impact health and presents ways the healthcare system can participate in the solution. The book covers major chronic diseases and the special populations impacted by structural inequalities. Those working and studying public health, medicine, nursing, pharmacology will find this work of interest, as well as diversity and disparity scholars and health policymakers. - Presents the concepts underlying the emerging field of structural inequalities - Provides examples of the influence of structural inequality on chronic disease and special populations - Identifies the path forward and how to engage in changing structural inequalities

*The Oxford Handbook of Ecocriticism* Greg Garrard  
2014-07-03 The Oxford Handbook of Ecocriticism provides a broad survey of the longstanding relationship between literature and the environment. The moment for such an offering is opportune in many respects: multiple environmental crises are increasingly inescapable at both transnational and local levels; the role of the humanities in addition to technology and politics is increasingly recognized as central for exploring and finding solutions; and the subject of ecocriticism has reached a kind of critical mass, both within its Anglo-American heartlands and beyond. From its origins in the study of American Nature Writing and British Romanticism, ecocriticism has developed

along numerous theoretical, historical, cultural and geographical axes, the most contemporary and exciting of which will be represented in the Handbook. The contributors include eminent founders of the field, including Michael Branch and Richard Kerridge, a number of key 'second-wave' ecocritics, and the best up-and-coming scholars. Topics covered include: Renaissance anxieties about nature; the challenges of representing climate change; the racialization of the environment in the early 20th century; language and the concept of biosemiotics; and the possibilities for environmental humour.
