Futuristic Manufacturing

Mithilesh K. Dikshit 2023-03-27 Increased industrial capacity, manufacturing output, and manufacturing technology all contribute significantly to a country's GDP. Manufacturing is the foundation of industrial production, so improving its methods and infrastructure is crucial for progress. Recent years have seen the introduction of a wide range of energy- and resource-efficient, environmentally friendly, and occupationally safe manufacturing techniques, and this book focuses on these latest techniques, as well as continuous advancement, in

order to meet current challenges. The book is divided into three sections: (1) subtractive manufacturing, (2) additive manufacturing, and (3) the use of artificial intelligence in manufacturing. It discusses micromaching, metal-based additive manufacturing, polymer-based additive manufacturing, hybrid additive manufacturing, and finally artificial intelligence in manufacturing. **Futuristic Manufacturing: Perpetual Advancement and Research Challenges** connects modern manufacturing methods and emerging trends in the industry. It adds a thorough examination of modern manufacturing techniques and modifications that may be implemented in the future, and is an excellent resource of information for undergraduate and graduate students in manufacturing.

Machine Maintenance Book

Kose Books 2019-10-28 This machine maintenance book will help you keep your machine park in good condition. Create your own maintenance plan. Fill it and use it. Service guidelines informing about the necessary inspections of the machine divided into activities performed daily, weekly, monthly, semi-annually and annually guarantee the reliable operation of your machines. You will never again forget about the obligatory inspections of each of your machines. Reports made in the book confirm the controls carried out. The book provides

an inspection log necessary when applying the ISO 9001 quality standard in your factory. HOW TO USE 1. Enter the machine number and type on the cover. 2. Fill in the blanks with the machine maintenance instructions. Start with daily activities. Then, the activities performed weekly, monthly, semi-annually and annually. 3. Then give the service book to the person responsible for maintenance. 4. Each machine should have its own book. 5. The service book is enough for a year. 6. The responsible person confirms the inspection by signatures with the date of execution in the appropriate place.
