Compensation Schemes for Damages Caused by Healthcare and Alternatives to Court Proceedings Dobrochna Bach-Golecka 2021-05-16 The book discusses compensation mechanisms and other non-judicial means that offer alternatives to court proceedings, designed and provided for within national legal regimes. Such schemes are primarily of a civil or administrative character and are mainly intended to supplement criminal liability for medical negligence. As such, the book focuses on medical malpractice and prospective medical harm from a civil law perspective. It examines the contemporary perspective of a patient-physician relationship, which has evolved from a relation of a quasi-patrimonial character into a partnership of quasi-equal parties, dealing with a medical treatment procedure as a scientific endeavor. It also reviews the extra-legal conditions that are taken into account in compensation arrangements, particularly the need to satisfy a psychological urge for conciliation and empathy on the part of medical personnel. Lastly, the book explores the responsibility of public authorities and healthcare providers to guarantee access to healthcare that is of a sufficient quality, based upon standards provided for in international (and European) law.

World Antimicrobial Awareness Week Vera Manageiro 2025-01-21 World Antimicrobial Week was established at the 68th World Health Assembly in 2015, and it takes place from the 18th to the 24th of November every year. Its key aim is to improve the awareness of antimicrobial resistance, highlighting the importance of education and communication. Antimicrobial resistance is caused by bacteria, viruses, fungi, and parasites not responding to current medicines (such as antibiotics, antivirals, antifungals and antiparasitics), leading to a higher risk of severe illness and death. This has a huge economic impact, leading to around five million deaths yearly, increased health expenditure, and, ultimately, inequalities. Several causes lead to antimicrobial resistance, varying from region to region. These include the misdiagnosis of certain diseases with the consequent misuse of antimicrobials; the overuse of antimicrobials in humans, animals, and crops; or the lack of hygiene, sanitation and access to water. Due to these different causes, antimicrobial resistance needs a multisectoral response, focusing on the specific circumstances of each country and region.
