Modern Data Protection W. Curtis Preston 2021-04-29 Give your organization the data protection it deserves without the uncertainty and cost overruns experienced by your predecessors or other companies. System and network administrators have their work cut out for them to protect physical and virtual machines in the data center and the cloud; mobile devices including laptops and tablets; SaaS services like Microsoft 365, Google Workspace, and Salesforce; and persistent data created by Kubernetes and container workloads. To help you navigate the breadth and depth of this challenge, this book presents several solutions so you can determine which is right for your company. You'll learn the unique requirements that each workload presents, then explore various categories of commercial backup hardware, software, and services available to protect these data sources, including the advantages and disadvantages of each approach. Learn the workload types that your organization should be backing up Explore the hardware, software, and services you can use to back up your systems Understand what's wrong with your current data protection system Pair your backed-up workloads to the appropriate backup system Learn the adjustments that will make your backups better, without wasting money

Closing the Execution Gap Richard Lepsinger 2010-06-15 CLOSING THE EXECUTION GAP Once upon a time strategy was king. Leaders immersed themselves in the matter of planning how best to achieve their company's goals. The subject dominated the attention of senior executives and the writings of consultants and management gurus. Experts of various stripes weighed in on how to put strategic planning processes in place and transform employees at all levels into strategic thinkers. Naturally, leaders assumed all this strategizing would pay off. And yet, for too many organizations the promised results never came to pass. Quite simply, they couldn't execute. Now, the business world has shifted its focus to the consistent delivery of results. If an organization can't execute its plans and initiatives, nothing else matters: not the most solid, well thought-out strategy, not the most innovative business model, not even technological breakthroughs that could transform an industry. As it turns out, the "conventional wisdom" about what it takes to implement strategy and deliver results isn't all that wise. So what really differentiates the companies that are able to get things done day-to-day and deliver consistent results? The answer is found in the pages of Richard Lepsinger's ground-breaking book, *Closing the Execution Gap*. Based on extensive research and years of practical experience, the book outlines five prerequisites for effective execution and five "Bridges" that differentiate companies that do it best. It also describes six "Bridge Builders" leaders at all levels can use to close the execution gap in their company or team and help people get things done. Specifically, it addresses: What really gets in the way of getting things done for individuals, teams and entire companies What leaders can do to enhance their organization's ability to close the execution gap and achieve solid

business results What it takes to consistently execute plans and initiatives at a day-to-day operational level The book features many case studies of companies that have a track record of effective execution (Hewlett-Packard, Costco, Procter & Gamble) and those who have struggled with closing the gap between creating a vision and delivering results (Dell, American Airlines, GM). As the business world becomes more competitive and less forgiving, execution matters more than ever. This is a book for the times we live in and one that for many companies could mean the difference between success and failure.

The Right Light Krista Smith 2014-04-15 Natural light can be the right light—indoors and out, all day long. Working with children, families, and couples, Krista Smith covers the entire process of designing natural-light portraits that are as vibrant and colorful as the personalities and relationships they depict. From early morning, through the tricky midday hours, to the end-of-day sunset shots, Smith shows you where to find the best natural light and how to use it most effectively for flattering results. She also explores the impact of weather on the quality of the natural light and demonstrates how it can be turned to your advantage for stand-out results. For indoor shoots, Smith demonstrates how one simple window can produce classic portrait looks and demonstrates simple background and lighting refinements that put you on the path to studio-quality results. From marketing and scheduling, to location selection and shooting, to product design and branding, this book presents a road-map to professional success in natural-light portrait photography.

In Over Our Heads Robert Kegan 1998-07-21 If contemporary culture were a school, with all the tasks and expectations meted out by modern life as its curriculum, would anyone graduate? In the spirit of a sympathetic teacher, Robert Kegan guides us through this tricky curriculum, assessing the fit between its complex demands and our mental capacities, and showing what happens when we find ourselves, as we so often do, in over our heads. In this dazzling intellectual tour, he completely reintroduces us to the psychological landscape of our private and public lives. A decade ago in *The Evolving Self*, Kegan presented a dynamic view of the development of human consciousness. Here he applies this widely acclaimed theory

to the mental complexity of adulthood. As parents and partners, employees and bosses, citizens and leaders, we constantly confront a bewildering array of expectations, prescriptions, claims, and demands, as well as an equally confusing assortment of expert opinions that tell us what each of these roles entails. Surveying the disparate expert “literatures,” which normally take no account of each other, Kegan brings them together to reveal, for the first time, what these many demands have in common. Our frequent frustration in trying to meet these complex and often conflicting claims results, he shows us, from a mismatch between the way we ordinarily know the world and the way we are unwittingly expected to understand it. In *Over Our Heads* provides us entirely fresh perspectives on a number of cultural controversies—the “abstinence vs. safe sex” debate, the diversity movement, communication across genders, the meaning of postmodernism. What emerges in these pages is a theory of evolving ways of knowing that allows us to view adult development much as we view child development, as an open-ended process born of the dynamic interaction of cultural demands and emerging mental capabilities. If our culture is to be a good “school,” as Kegan suggests, it must offer, along with a challenging curriculum, the guidance and support that we clearly need to master this course—a need that this lucid and richly argued book begins to meet.
